## What Changed in October?

October was a relatively volatile month for financial markets with the US stock market making a fresh record high mid-month, which was then followed by falls in the last week of the month as investors became more cautious ahead of the US election and following mixed earnings results from major tech companies. Bonds were weaker over the month as yields rose following the stronger-than-expected US employment report for September which dampened expectations of aggressive rate cuts. The Australian Dollar was negatively impacted by a stronger US Dollar and weakness in the Chinese Yuan following further Chinese interest rate cuts.

- In currency-hedged terms, developed market equities (MSCI World ex-Australia) declined 0.9% in October. In unhedged terms, developed market shares rose 3.9%. Emerging market shares (MSCI Emerging Markets) fell 2.7% and Australian shares (S&P/ASX 200) lost 1.3%.
- 10-year bond yields rose 44 basis points (bps) in the US, 55bps in Australia, 44bps in the UK, 26bps in Germany and 9bps in Japan.
- Investment-grade corporate bond spreads in the US narrowed by 6bps to 86bps over US treasuries while US high yield bond spreads fell by 15bps to 288bps.
- The Australian Dollar fell 3.9 US cents to US\$0.6550.
- Oil prices rose 1.2% to US\$69.58 per barrel (WTI). Gold rose 4.0% to US\$2,734 per troy ounce. Iron ore prices fell 3.4% to US\$103.78 per tonne.
